# SPLUNK QUICK START FOR INFRASTRUCTURE MONITORING
Fast-Track Your Deployment to Operational Intelligence

The Splunk Quick Start for Infrastructure Monitoring provides a fast and complete approach to get up and running with Splunk Enterprise at a low price.

splunk> + **Splunk Apps + Add-Ons** + **Expert Guidance** + **Edu Credits + .conf Passes** = **Splunk Quick Start**

With the explosion of growth in datacenter technologies, IT infrastructure is more disjointed and complicated than ever. To navigate this ever-changing technology landscape, you need complete visibility into your infrastructure and the applications and services that run on top of it. By using Splunk software and a platform-based approach to managing your IT infrastructure, you can resolve problems faster, reduce downtime and increase customer satisfaction.

Whether you're in infrastructure support, IT operations, systems administration, or on the business side, the Quick Start can get you up and running with Splunk Enterprise at a low price. It has everything you need to monitor your infrastructure in an easy-to-deploy package. Benefits of the Splunk Quick Start include:

- **Fast time-to-value at a low price** with everything you need to deploy Splunk quickly, maximize your ROI, and monitor and troubleshoot your environment
- **Scalable packages** in small, medium and large sizes to meet your needs
- **Immediate insight** into your infrastructure with tailored apps for your use case
- **Deployment success in 1 week** with remote deployment support and a personal customer success manager
- **Continued support** with professional services, education and .conf event passes
